

Practical Gen AI proficiency

Large Company

Start enterprise AI training with a controlled proof, not a giant rollout.

EA3 supports staged Gen AI proficiency pilots for large organizations that need usage evidence, privacy boundaries, and leader visibility before scaling.

Enterprise Readiness Pilot

\$39,900

100 employee seats at \$399 per seat. Larger rollout pricing follows capacity and governance review.

Clean pilot. Clear decision.

FOR COMPANIES WITH 500+ EMPLOYEES

A practical company rollout model

ENTERPRISE READINESS PILOT

Why this buyer cares

- Large organizations need evidence before broad AI training spend.
- AI proficiency must include human review, privacy judgment, and escalation habits.
- Leaders need adoption and risk signals without inspecting private employee work.

What EA3 gives them

- Structured 30-day path with practical Gen AI proficiency outcomes.
- Prompt Champ practice, Skill Checks, remediation, and role-relevant evidence.
- Owner/admin cost guardrails, including a learner-level \$25 AI cost alert.

Recommended pricing

Package	Price	Notes
100-seat pilot	\$39,900	\$399 per employee
250-seat staged rollout	\$87,500	\$350 per employee
500-seat rollout	\$149,500	\$299 per employee after scale validation
Enterprise setup	Custom	Governance, reporting, procurement, or integration scope

Pilot shape

- One complimentary executive sponsor seat for a CISO, Chief Training Officer, or AI adoption lead.
- Controlled department or business-unit launch before enterprise expansion.
- Admin and sponsor visibility into progress, support needs, usage/cost, and adoption signals.
- 500-seat rollout should follow capacity validation and production scale readiness.

Best fit: enterprise teams that want a measured AI adoption proof before committing to a broad workforce rollout.

Pricing is a recommended starting model and can be adjusted for scope, support, procurement, and rollout timing.
