

Practical Gen AI proficiency

Medium Company

Turn scattered AI use into measurable workplace skill.

EA3 gives department leaders a controlled way to build Gen AI proficiency, observe adoption, and prepare a wider rollout without exposing private learner work.

FOR COMPANIES OF 51-500 EMPLOYEES

Department Pilot

\$11,250

25 employee seats at \$450 per seat. Scale packages lower the per-seat rate.

Clean pilot. Clear decision.

A practical company rollout model

DEPARTMENT PILOT

Why this buyer cares

- Employees are already using AI, but skill and judgment vary widely.
- Training leaders need evidence of behavior change, not attendance alone.
- Security and governance leaders need safe-use habits reinforced early.

What EA3 gives them

- Role-grounded scenarios across practical work tasks.
- Validated Skill Checks with feedback and remediation when needed.
- Company-level reporting without exposing private prompts, answers, or profile summaries.

Recommended pricing

Package	Price	Notes
25-seat pilot	\$11,250	\$450 per employee
50-seat rollout	\$21,000	\$420 per employee
100-seat rollout	\$39,900	\$399 per employee
Continuation	\$49 / learner / month	Optional after the core program

Pilot shape

- One complimentary executive sponsor seat for a CISO, Chief Training Officer, or department lead.
- Department cohort with personalized coaching, Prompt Champ shields, Skill Checks, and repair paths.
- Sponsor dashboard signals for adoption, progress, check-in risk, aggregate AI usage, and privacy boundaries.
- Pilot evidence supports a decision to expand, adjust, or pause.

Best fit: HR, L&D, operations, customer support, finance, and administrative teams ready to standardize AI use.

Pricing is a recommended starting model and can be adjusted for scope, support, procurement, and rollout timing.
